Subject Index

ADCC (K-cell) lysis of human erythrocytes sensitized with rhesus alloantibodies (URBANIAK & AYOUB GREISS), 447.

ADP induced surface charge changes of adult and newborn platelets (KOSZTOLÁNYI, JOBST, KELLERMAYER & LUDÁNY), 257.

Alloimmunized patients, cross matching procedure for selection of platelet donors for (WATERS, MINCHINTON, BELL, FORD & LISTER), 335.

Anaemia, childhood aplastic, sera from, in semi-solid agar, high human burst-forming activity in (KIGASAWA & NISHIHIRA), 303.

Anaemia, congenital dyserythropoietic, type I: absence of clonal expression in the nuclear abnormalities of cultured erythroblasts (VAINCHENKER, GUICHARD, BOUGUET & BRETON-GORIUS), 33.

Anaemia, non-spherocytic haemolytic, in mother and son associated with hexokinase deficiency (NEWMAN, MUIR & PARKER), 537.

Anaemia, sideroblastic, energy-dispersive X-ray analysis of the mitochondria of (GRASSO, MYERS, HINES & SULLIVAN), 57.

Anaemia, untreated, pernicious, marrow cells from patients with, cannot use tetrahydrofolate normally (DEACON, CHANARIN, PERRY & LUMB), 523.

Antithrombin III, active and inactive, immunochemical analysis of (MCKAY), 277.

Antithrombin III deficiency in an Australian family (PITNEY, MANOHARAN & DEAN), 147.

Blast cells, the value of ultrastructural cytochemistry in defining patterns of differentiation in (CATOVSKY, O'BRIEN & COSTELLO), 332.

Bone marrow colony stimulating activity, endogenous (FRANCIS, RHODES, BERNEY, WING & HOFFBRAND), 323.

Bone marrow stem cells, human, isolation of, using monoclonal antibodies and fluorescence activated cell sorting (LINCH, BEVERLEY & DELIA), 324.

Book reviews

Aplastic Anaemia, Pathophysiology and Approaches to Therapy, 338.

Blood Cells and Vessel Walls, 163.

Haematological Cytochemistry, 512.

Haemophilia Centre Handbook, 163.

Haemostasis and Thrombosis, 339.

Liposomes in Biological Systems, 163.

Preleukaemia, 338.

Progress in Clinical Immunology, Vol 4, 511.

Technical Hematology, 511.

Topical Reviews in Haematology, 339.

Casein, failure of red blood cells to promote incorporation of amines into (BOARD), 315.

Chimaerism, haemopoietic, in dizygotic twins, another example of (BIRD, GIBSON, WINGHAM, MACKINTOSH, WATKINS & GREENWELL), 439.

Cimetidine and granulopoiesis: bone marrow culture studies in normal man and patients with cimetidine-associated neutropenia (FITCHEN & KOEFFLER), 361.

Dyshaematopoiesis of unknown origin, C-group chromosome abnormalities in bone marrow cells of three children with (HAGEMEIJER, HÄHLEN, SMIT & VAN ZANEN), 377.

Endothelial cell hybrids and the suppression of factor VIII related antigen expression (EDGELL, REISNER & GRAHAM), 613

Erythroid progenitors, human, express HLA-D related antigens (SIEFF, ROBINSON & GREAVES), 325.

Erythropoiesis in β-thalassaemia trait, ultrastructural studies of (WICKRAMASINGHE & HUGHES), 401.

Factor-VII$_{COAG}$ kinetics in factor-VIII-CRM$^+$ and factor-VII-CRM$^-$ deficiencies (NENCI, AGNELLI & DE REGIS), 307.

Factor VIII coagulant activity, studies on the antigen related to (ROTBLAT & TUDDENHAM), 334.

Factor VIII complexes, altered, in sickle cell disease (MACKIE, BULL & BROZOVIĆ), 499.

Factor VIII concentrate, intermediate purity: changes in antigen and coagulant activity during production (FOSTER, PATTERSON, DICKSON & PROWSE), 334.

Factor-VIII response to a Valsalva manoeuvre (JANKOVIĆ), 137.

Factor VIII, standardization of (BARROWCLIFFE & KIRKWOOD), 471, 483.

Factor VIII/von Willebrand's factor, binding and release of, by human endothelial cells (WALL, COUNTS, HARKER & STRIKER), 287.

Fibrinogen, abnormal, with delayed fibrinopeptide A release (LANE, VANROSS, KAKKAR, BOTTOMLEY, DHIR, HOLT & MACIVER), 89.

Fibroblasts, bone marrow, fat cells and colony-stimulating activity (GORDON, KING & GORDON-SMITH), 151.

Folate-binding protein in lymphocytes during transformation, the synthesis of (DA COSTA & SHARON), 575.

Frozen blood, a successful programme of immunizing Rh −ve male volunteers using (URBANIAK & ROBERTSON), 336.

Frozen platelets, reconstituted, the survival and function of (SLADE, FRASER, TAYLOR & GUNSTONE), 336.

Gammopathy, benign monoclonal, the physiopathological significance of: a study of 64 cases (CARTER & TATARSKY), 565.

Genes, human globin, mapping of (JACKSON & WILLIAMSON), 341.

Glanzmann's thrombasthenia, studies on platelet glycoproteins in, using ^{125}I-labelled lectins (MCGREGOR, CLEMETSON, JAMES, GREENLAND, LÜSCHER & DECHAVANNE), 99.

Granulocytic colonies of high proliferative activity in association with lymphocyte colony-forming cells in human peripheral blood (GORDON & GORDON-SMITH), 324.

Granulopoiesis and cimetidine (FITCHEN & KOEFFLER), 361.

Haemoglobin, fetal, in kalar-azar, transient increase of (SCHILIRÒ, MUSUMECI, RUSSO, MARINO, SCIOTTO & RUSSO), 207.

Haemoglobin H, levels of, and proportions of red cells with inclusion bodies in the two types of haemoglobin H disease (WINICHAGOON, ADIROJNANON & WASI), 507.

Haemoglobin New York (β^{113} Valine→Glutamic acid), globin chain synthesis in (TODD, CHAN, SCHNEIDER, DOZY, KAN & CHAN), 557.

Haemoglobin synthesis in an established human cell line (RUTHERFORD, CLEGG & WEATHERALL), 326.

Haemophilia A, treatment of bleeding episodes in, complicated by factor VIII inhibitors (WENSLEY, STEVENS, BURN & DELAMORE), 328.

Hb Bart's (γ4) in Negro neonates, the significance of (HIGGS, PRESSLEY, SERGEANT & WEATHERALL), 327.

Hb Q-H disease, the genetic basis of (HIGGS, HUNT, DRYSDALE, CLEGG, PRESSLEY & WEATHERALL), 387.

Heinz body formation, acetylphenylhydrazine-induced, effect of oral administration of ascorbate on (WILLIAMSON & WINTERBOURN), 319.

Hexokinase and glucose-6-phosphate dehydrogenase isoenzymes, isoelectric focusing of, in erythrocytes of newborn infants and adults (GAHR), 529.

Hodgkin's disease, insulin levels in (PAVELIĆ, PEKIĆ, SLIJEPČEVIĆ & POPOVIĆ), 133.
9 Hydroxy-methyl-ellipticinium, drug dependent red cell antibodies and intravascular haemolysis occurring in patients treated with (CRIEL, HIDAJAT, CLARYSSE & VERWILGHEN), 549.

IgG, platelet-associated, the clinical significance of: a study on 298 patients with various disorders (MUELLER-ECKHARDT, KAYSER, MERSCH-BAUMERT, MUELLER-ECKHARDT, BREIDENBACH, KUGEL & GRAUBNER), 123.
IgG1 autoantibodies, red cells sensitized with, quantitative aspects of the destruction of: an application of flow cytofluorometry (VAN DER MEULEN, DE BRUIN, GOOSEN, BRUYNES, JOUSTRA-MAAS, TELKAMP, VON DEM BORNE & ENGELFRIET), 47.
Immunohaematology, proficiency testing in (PINKERTON), 335.
^{111}Indium-labelled platelets, radionuclide distribution following injection of (KLONIZAKIS, PETERS, FITZPATRICK, KENSETT, LEWIS & LAVENDER), 595.
Interferon, abolished production of, by leucocytes of patients with the acquired cytogenetic abnormalities 5q− or −5 in secondary and *de novo* acute non-lymphocytic leukaemia (PEDERSEN-BJERGAARD, HAAHR, PHILIP, THOMSEN, JENSEN, ERSBOLL & NISSEN), 211.
Iron binding proteins in selected human peripheral blood cell sets: immunofluorescence (NISHIYA, CHIAO & DE SOUSA), 235.
Iron metabolism in transformed erythroid cells (RUTHERFORD, PETO & WEATHERALL), 329.
Iron overload and toxicity in cell cultures (HOY & JACOBS), 329.
Isoferritins, rat liver (TREFFRY, HARRISON & SHINJO), 330.

Kalar-azar, transient increase of fetal haemoglobin in (SCHILIRÒ, MUSUMECI, RUSSO, MARINO, SCIOTTO & RUSSO), 207.

Leukaemia, acute lymphoblastic, in remission, the significance of splenomegaly in: observations in five patients (MONOHARAN, CATOVSKY, GOLDMAN, LAURIA, LAMPERT & GALTON), 330.
Leukaemia, acute lymphoblastic, monitoring disease control with serial lymphocyte marker studies in children with (TRUMPER, BARRETT & HILL), 331.
Leukaemia, acute lymphoblastic, relapsing as acute myelomonocytic leukaemia after a remission of 7 years (BOHINJEC), 495.
Leukaemia, acute non-lymphocytic, terminal transferase expression in (BRADSTOCK, JANOSSY, PATTERSON, BENNETT, WONKE, GANESHAGURU & HOFFBRAND), 325.
Leukaemia, acute promyelocytic, complex translocations involving chromosomes 15 and 17 in (BERNSTEIN, MENDELOW, PINTO, MORCOM & BEZWODA), 311.
Leukaemia, B-chronic lymphatic, T-lymphocyte function in (MCCANN, WHELAN, WILLOUGHBY, LAWLOR, GREALLY & TEMPERLEY), 331.
Leukaemia, B-chronic lymphocytic, reduced T-colony forming capacity by T-lymphocytes from (FOA, CATOVSKY, LAURIA & GALTON), 623.
Leukaemia, chronic granulocytic, circulating granulocytic and erythroid progenitor cells in (GOLDMAN, SHIOTA, TH'NG & ORCHARD), 7.
Leukaemia, chronic granulocytic, in blast transformation, histological study of (ISLAM, CATOVSKY, GOLDMAN & GALTON), 326.
Leukaemia, chronic myelogenous, 9q+ marker chromosome in, without the Ph^1 (VERHEST, LUSTMAN & DEBUSSCHER), 493.
Leukaemia, familial acute myeloid, characteristics of a cell line established from a child with (FISCHER, KARPAS, NACHEVA, HAAS, WINTERLEITNER & KREPLER), 23.
Leukaemia, hairy cell, acquired von Willebrand's syndrome associated with (ROUSSI, HOUBOUYAN, ALTERESCU, FRANC & GOGUEL), 504.
Leukaemia, hairy cell, with T cell features (SEMENZATO, BASSO, CARTEI, PEZZUTTO & COCITO), 491.
Leukaemia, prolymphocytic, with erythrophagocytic activity (MARTELLI, FALINI, TABILIO, VELARDI & ROSSODIVITA), 141.
Leukaemia, secondary and *de-novo* acute non-lymphocytic, abolished production of interferon by leucocytes of patients with the acquired cytogenetic abnormalities 5q− or −5 in (PEDERSEN-BJERGAARD, HAAHR, PHILIP, THOMSEN, JENSEN, ERSBOLL & NISSEN), 211.
Leukaemic lymphoblasts, inhibitory effect of autologous plasma on the uptake of tritiated thymidine by, and its relation to prognosis (SUGDEN & LILLEYMAN), 367.
Lymphoma, plasmacytoid lymphocytic, without serum monoclonal IgM, clinical and immunologic spectrum of (LEVINE, LICHTENSTEIN, GRESIK, TAYLOR, FEINSTEIN & LUKES), 225.
Lymphoma, Sternberg's: effect of treatment regimen upon prognosis in 38 cases (STARKE & WILTSHAW), 351.
Lymphoproliferative disorders, studies of cell size in (PATTERSON, GOLDSTONE, RICHARDS & CAWLEY), 337.

Malaria, *P. falciparum*, the anaemia of (ABDALL, WEATHERALL, WICKRAMASINGHE & HUGHES), 171.
Malarial parasite and the red cell (PASVOL & WEATHERALL), 165.
Maturation index: a contribution to quantification in the FAB classification of acute leukaemia (VAN RHENEN, VERHULST, HUIJGENS & LANGENHUIJSEN), 581.
Megakaryocytes in malignant disorders, phagocytosis by (HALIL & BARRETT), 161.
Membrane characteristics and metabolic properties of glucose-6-phosphate dehydrogenase deficient red cells (JANSSON, HEKALI, GRIPENBERG, HÄRKÖNEN & VUOPIO), 79.
Mitochondria of sideroblastic anaemia, energy-dispersive X-ray analysis of (GRASSO, MYERS, HINES & SULLIVAN), 57.
Myeloid and monocytoid colonies grown in agar, the rapid identification of (LINCH, PATTERSON & ROSENDAAL), 333.

Non-Hodgkin's lymphomas, haematological assessment and prognosis in (LEONARD), 332.

Pelger-Huet leucocyte anomaly, incidence of infections in patients with (VAYA & AZNAR), 621.
$PGF_{1\alpha}$, 6-keto, a radioimmunoassay for: technique and clinical application (MACHIN, DEFREYN, CHAMONE & VERMYLEN), 328.
Phagocytosis by megakaryocytes in malignant disorders (HALIL & BARRETT), 161.
Platelet-activating factor (PAF-acether) secretion from platelets: effect of aggregating agents (CHIGNARD, LE COUEDIC, VARGAFTIG & BENVENISTE), 455.
Platelet hyperfunction in thromboembolic disorders, a comparison of methods for the study of (CHEN & WU), 263.
Platelets, adult and newborn, ADP induced surface charge changes of (KOSZTLÁNYI, JOBST, KELLERMAYER & LUDÁNY), 257.
Platelets, human blood, the abilities of, to bind extracellular calcium and to be aggregated by adenosine diphosphate are related (TAYLOR & HEPTINSTALL), 115.
Polycythaemia, relative, management of: studies of cerebral blood flow and viscosity (HUMPHREY, MICHAEL & PEARSON), 427.
Polycythaemia, relative, red cell mass, plasma volume and blood volume before and after venesection in (HUMPHREY, MICHAEL & PEARSON), 435.
Prethrombotic state (SIXMA), 515.
Purpura, immune thrombocytopenic, subclasses of IgG antibodies in (ROSSE, ADAMS & YOUNT), 109.

Sickle cell anaemia, failure to demonstrate red cell membrane protein abnormalities in (Ballas & Burka), 627.
Sickle cell disease, altered factor VIII complexes in (Mackie, Bull & Brozović), 503.
Spherocytosis, hereditary, normal fluidity of red cell membranes in (Cooper, Sawyer, Leslie, Hill, Gill & Wiley), 299.
Spherocytosis, hereditary, the fluidity gradient in erythrocyte membranes in: a spin label study (Jansson, Johnsson, Gripenberg & Vuopio), 73.
Spherocytosis linkage, hereditary (Reznikoff-Etievant, Bonaidi, Maigret, Malvoisin, Maynier, Mesnard & Haupman), 153.
Spleen function, use of ^{111}indium-labelled platelets to measure (Peters, Klonizakis, Lavender & Lewis), 587.
Stem cells, haemopoietic, and murine CFU-s (Loutit), 323.
Stromal cells, bone marrow, in suspension and monolayer cultures, characterization of (Mendelow, Grobicki, De La Hunt, Katz & Metz), 15.

Thalassaemia, α, detection in negro infants (Higgs, Pressley, Clegg, Weatherall, Higgs, Carey & Serjeant), 39.
Thalassaemia, α, in Saudi Arabia, genetics of (Pressley, Higgs, Clegg, Pembrey & Weatherall), 327.
Thalassaemia, β, homozygous, and transfusional iron overload, patients with: binding of serum ferritin to concanavalin A (Worwood, Cragg, Jacobs, McLaren, Ricketts & Economidou), 409.
Thalassaemia, β, trait, ultrastructural studies of erythropoiesis in (Wickramasinghe & Hughes), 401.
Thalassaemia, homozygous δ-, in Japan, five families with (Yasakawa, Saito, Fujita, Ohta, Ikeda, Matsumoto & Kobayashi), 199.
Thalassaemia in Britain, haematological aspects of antenatal diagnosis of (Matsakis *et al*), 185.
Thalassaemia, the red blood cell membrane in (Rachmilewitz & Kahane), 1.
Thalassaemic patients, splenectomized, increased transferrin iron saturation in (Pootrakul, Rugkiatsakul & Wasi), 143.
Thrombasthenia or prolonged calcium deprivation, decreased associated of ^{45}calcium with platelets unable to aggregate due to (Peerschke, Grant & Zucker), 247.
Thromboembolic disorders, a comparison of methods for the study of platelet hyperfunction in (Chen & Wu), 263.
Thrombosis, deep vein, and changes in coagulation and fibrinolysis after gynaecological operations in Chinese: the effect of oral contraceptives and malignant disease (Tso, Wong, Chan, Chan, Ma & Todd), 603.
Thromboxane production, impaired, by newly formed platelets after aspirin administration to thrombocytopenic rats (Dejana, Barbieri, Cerletti, Livio & De Gaetano), 465.
Transferrin, *in vitro*, evidence for the functional heterogeneity of the two sites of (Van Baarlen, Brouwer, Leibman & Aisen), 417.
Transferrin, the uptake of radioactive iron from, by human bone marrow cells (May, De Souza & Jacobs), 329.
Transfusion can change the labelling index in AML: association of post-transfusion LI and remission status (Paton, Ekert, Toogood, Waters & Dobrostanski), 157.

Valsalva manoeuvre, factor-VIII response to (Janković), 137.
Von Willebrand's disease, patterns of factor-VIII related antigen on crossed immunoelectrophoresis and large pore polyacrylamide gel-crossed immunoelectrophoresis in (Fukui, Mikami, Takase, Fujimura, Nishino & Yoshioka), 269.
Von Willebrand's syndrome, acquired, associated with hairy cell leukaemia (Roussi, Houbouyan, Alterescu, Franc & Goguel), 503.
